

410

(UNS S41000) W. Nr. 1.4006

Chemical composition	Cr	Ni	Mn	P	S	Si
% Present (Max)	11.5-13.5	0.75	1.00	0.040	0.030	0.08-0.15

Grade 410 is a general-purpose martensitic stainless steel that can be hardened by heat treatment. It offers good corrosion resistance, high strength, and wear resistance. Commonly used for valves, pump shafts, cutlery, fasteners, and applications requiring moderate corrosion resistance combined with high mechanical properties.

Note: Values are in accordance with EN 10088 specifications. Actual mill certs available upon request.
